### CAREER SUMMARY:

---

Software Developer with 3+ years of experience in mobile and web development. Proficient in Flutter, React, Firebase, JavaScript, Python, and REST APIs. Holds a B.S. in Computing with strong skills in full-stack development, cloud integration, and multithreaded systems. Known for building secure, user-friendly apps and collaborating effectively on technical teams.

### WORK EXPERIENCE:

---

#### BEMELO HEALTH

##### Software Engineering Intern | 01/2025 – 05/2025

- Applied modern software development techniques and extensive code refactoring to improve app performance, reduce technical debt, and increase maintainability within a Flutter-based health app.
- Designed and implemented RESTful web services integrated with SQL/NoSQL databases, enabling secure login, real-time messaging, and scalable backend infrastructure.
- Conducted scalability, usability, and performance testing using tools like Postman and Flutter DevTools, contributing to continuous integration pipelines.
- Authored technical documentation outlining API endpoints, data structures, and user flows to support onboarding and future enhancements.
- Automated backend workflows using Python, leveraging relational database concepts from coursework in Database Management.
- Collaborated remotely with cross-functional teams using Slack, GitHub, and Zoom, and presented weekly project updates, enhancing technical communication skills.

### RELEVANT PROJECTS:

---

#### Portfolio Website

*React, Vite, Tailwind CSS*

- Designed and deployed a personal portfolio site showcasing projects and skills. Implemented responsive UI, routing, and GitHub-hosted deployment using modern web tools.

#### Therapy App for Elderly Assistance

*Flutter, Firebase, Dart, REST API*

- Built a mobile app to help elderly users request meals, view therapy sessions, and manage appointments. Integrated secure authentication and real-time data handling using Firebase.

### EDUCATION:

---

2020 – 2025 | University of West Georgia

Bachelor of science in computing – Software Development

### SKILLS:

---

- **Programming Languages:** Dart, Python, JS, Java, SQL, HTML, CSS
- **Libraries & Frameworks:** React, Node.js, Flutter, Express
- **Tools & Platforms:** Git, VS Code, Firebase, AWS, Postman
